Preface

"GREGORY'S STREET DIRECTORY OF ADELAIDE AND SUBURBS" is the most complete and up-to-date and the clearest work of reference of its kind yet available to the public of the metropolitan district.

The maps, drawn exactly to scale by expert draftsmanship, show the whole of the thousands of streets in that territory. The principal through streets and roads are given in heavy outline, and the railways and tramways, as well as other distinctive points, are drawn in prominently to make reference easy and certain.

New and Useful Features

The scale of the maps, 30 chains to the inch (except in four maps of the city proper, the scale of which is enlarged to 15 chains to the inch), is such as to permit of a conveniently wide area being in view at any one time, without any sacrifice of clearness. This allows of the reader being able to see at a glance the position of any ascertained street in relation to many other points.

A new feature of the Directory is that each map exactly fits against the map on any of its borders, with the further advantage of a generous overlap in each case, to enable the reader to turn from one map to another in following any thoroughfare without break.

How to Find any Street

All streets, roads and other thoroughfares are indexed in exact alphabetical order. By the use of this index, the reader is able to determine the position of any street on any map without trouble or delay.

For example, should the location of Alexander Avenue, Rose Park, be desired to be known, all the reader needs to do is to refer to the name in the index, where the position is given as "J11—Map 6." By then turning to Map 6 he is immediately able to find Alexander Avenue at a point at which a line drawn down from the marginal "J" intersects a line drawn at right angles from marginal "11."

WARNING!

Speed Limits

when your engine
is Reconditioned

by
Southcott Ltd.

270 GILLES STREET

If you've had good service out of your car don't sacrifice it for a few pounds—have the engine reconditioned by our "Mirror Finish" Reboring Process.

Hundreds are doing this and enjoying all the original power and pep the car had when new.

There is no machinery in South Australia to equal ours for Rebores, Crankshaft grinding and bearing remetalling—it means extreme accuracy and satisfaction. The wonderful Churchill Crankshaft Machine for instance, allows a tolerance of only .00025 in.

It will cost less in the long run to insist on having our machine work.

Make Success a Certainty!

**Lloyd's
R.A.A.
of S.A.
Motor Car
Policy**

●

By arrangement with Lloyd's Underwriters, the R.A.A. is able to offer to its members exclusively a special comprehensive motor car policy at 20% below the usual premium rates. The terms of this policy are particularly generous and include several benefits not available elsewhere. In addition to its superior cover, this policy enables members to make a direct saving in premium compared with other insurances.

Road Maps

A good road map is an essential part of every motorist's equipment. Without it, he is like a man groping for the light switch in a dark room. Road maps of every State can be secured from the R.A.A. Touring Department. Guides in book form are also available.

If you are interested in maps call at the R.A.A. Office and inspect. Prompt attention will be given to requests received through the post.

**R.A.A.
Technical
Department**

•

The R.A.A. Technical Department is staffed by experts possessing a thorough knowledge of car mechanism. Its service provides free advice by interview or correspondence on such matters as mechanical defects, garage repair bills, etc. Inspections of second-hand cars and petrol consumption tests are carried out at a nominal charge. Quarterly maintenance inspections can also be arranged.

Street Numbers in the City of Adelaide

Below are the numbers of the corner buildings or allotments in the blocks of the more lengthy streets (arranged alphabetically) in the City of Adelaide. To find the position of any building in any given street, the number of which is known, all the reader has to do is to refer to either the odd-number or even-number column, and thus ascertain between which two streets the required number is situated.

How to Find Any Street

The Sectional Maps in this part of the Directory cover an area within a wide radius from Adelaide. The maps are fully up-to-date and are revised from edition to edition. Each map slightly overlaps the maps around it in order that any particular thoroughfare may be traced with certainty by the reader having occasion to trace any street beyond one map.

Having ascertained from the exhaustive index of street names in the front portion of the Directory the index (location) number of any given street on any particular map, the reader has merely to cast his eye along an imaginary line connecting the given *letter* on the top of the map with the corresponding letter on the bottom of the map, and then to imagine a similar line running from the *number* on the edge of the map to the opposite edge. At or near the point at which the two lines intersect the required street will be found.

The location of any particular map relative to the whole of the territory embraced is shown on the Key Map overleaf.

The details of the central portion of Adelaide are shown in four large-scale maps (Nos. 1 to 4) placed sideways at the beginning of the map section. All the other maps are placed true north and south (with east and west respectively on the right and left of each map).
